

SEDGE MEADOW

A grass and sedge mix for level sites with saturated soil conditions (although it will tolerate drier soils late in the year), this meadow seed mix creates a diverse habitat, offering a variety of cover and food options for wildlife. Many of the plants attract pollinators, such as butterflies and hummingbirds. This seed mix includes at least 14 of 17 native permanent grass and sedge species and 27 of 31 native forb and shrub species. Apply at a rate of 37.75 PLS pounds per acre.
